

STA Repair agreement

To: _____ [Insert STA member's company name]

Please provide a quotation to repair my solar thermal/PV system. I understand and agree that:

- You may wish to inspect the system before you can provide a report/quotation for the work.
- You may charge a fee for that inspection and report/quotation. You will discuss and agree this fee with me at the outset.
- I agree to pay the fee even if I disagree with the findings and/or the conclusion is that the system is beyond economic or safe repair.
- Your report will detail the work necessary to fix the system along with any other recommendations to improve the system's performance or extend its life. The quotation will detail each separately so I can choose the extent of the work i.e. repair only or repair & improve.
- Your warranty only applies to the work that you undertake along with the components you supply and fit.
- I accept that your warranty does not cover anything other than your own work.
- I accept that you are not liable for any other parts of the system whatsoever nor are you liable if further faults develop after the initial repair (unless a direct fault with the components supplied and fitted by you)
- I accept that you can only guarantee that your work is compliant with relevant regulations. I understand this means that you will not be able to certify the entire system.
