

Liverpool Mutual Homes

81 Collectors Over 7 Sites

Project Overview

AES worked with Liverpool Mutual Homes and the contract consisted of seven installations in care homes across Liverpool serving over 200 residents. The systems were designed to feed hot water into a central boiler room from where it was distributed to individual residents and staff through the existing plumbing. Each care home had its individual system designed based on the number of residents, staff, the facilities available, the building's location and orientation.

Technical Overview

Client	Liverpool Mutual Homes
Array Size	81 collectors over 7 sites
Performance	120 MWh / yr
CO₂ Savings	21,996 kg – 65,018 kg / yr
