

Greenhouse Development, Leeds

Commercial Solar Thermal

Project Overview

The Greenhouse development provides 172 eco flats and offices. AES Solar Thermal produce 50% of the total yearly hot water requirements. The hot water is delivered to the flats through a central distribution network which the panels are plumbed into. Each panel is installed on a specifically designed frame which mounts it due south and at the most efficient angle to optimise roof space for maximum hot water generation.

Technical Overview

Client	Greenhouse Development
Array Size	192m ²
Performance	77,700 kWh / yr
CO₂ Savings	14,392 kg – 42.363 kg / yr

AES Solar offers extensive experience with solar systems for both domestic and business clients. Established in 1979, let us power you up!
