

# CASE STUDY

## Balmoral Estate Solar Thermal System

### Project Overview

The Royal Family are known for taking steps to reduce the carbon footprint across their Royal Estates, so it's not a surprise that one of the buildings on the Balmoral Estate has a solar thermal system installed to provide its hot water.

AES Supremacy Panels were installed on the Balmoral Castle Estates Office, also known as Baile-na-coille. Historic Scotland approved the install on the Grade B Listed building and the installation was completed in 2015.

AES Supremacy provides superior performance, as well as being one of the thinnest and lightest panels on the market. The streamline design of the AES Supremacy was of particular importance for this sensitive location.

AES Solar were first choice for the Balmoral Estate, celebrating 40 years of solar expertise in 2019. In addition to manufacturing the system, AES Solar's in-house engineers worked closely with the Estate to design, supply and install the panels.

“We look to be as self-sufficient as we can and AES Solar were able to provide exceptional Scottish made products along with installation that was sympathetic to the historic importance of the Royal Estate.”

- Richard Gledson, Resident Factor of Balmoral Estates

**AES Solar offers extensive experience with solar systems for both domestic and business clients. Established in 1979, let us power you up!**
